

# Memo

**To:** Trustee Maison  
**From:** Robert Kosin  
**cc:** Board of Trustees, Village President  
**Date:** December 16, 2016  
**Re:** South Barrington IGA Status

---

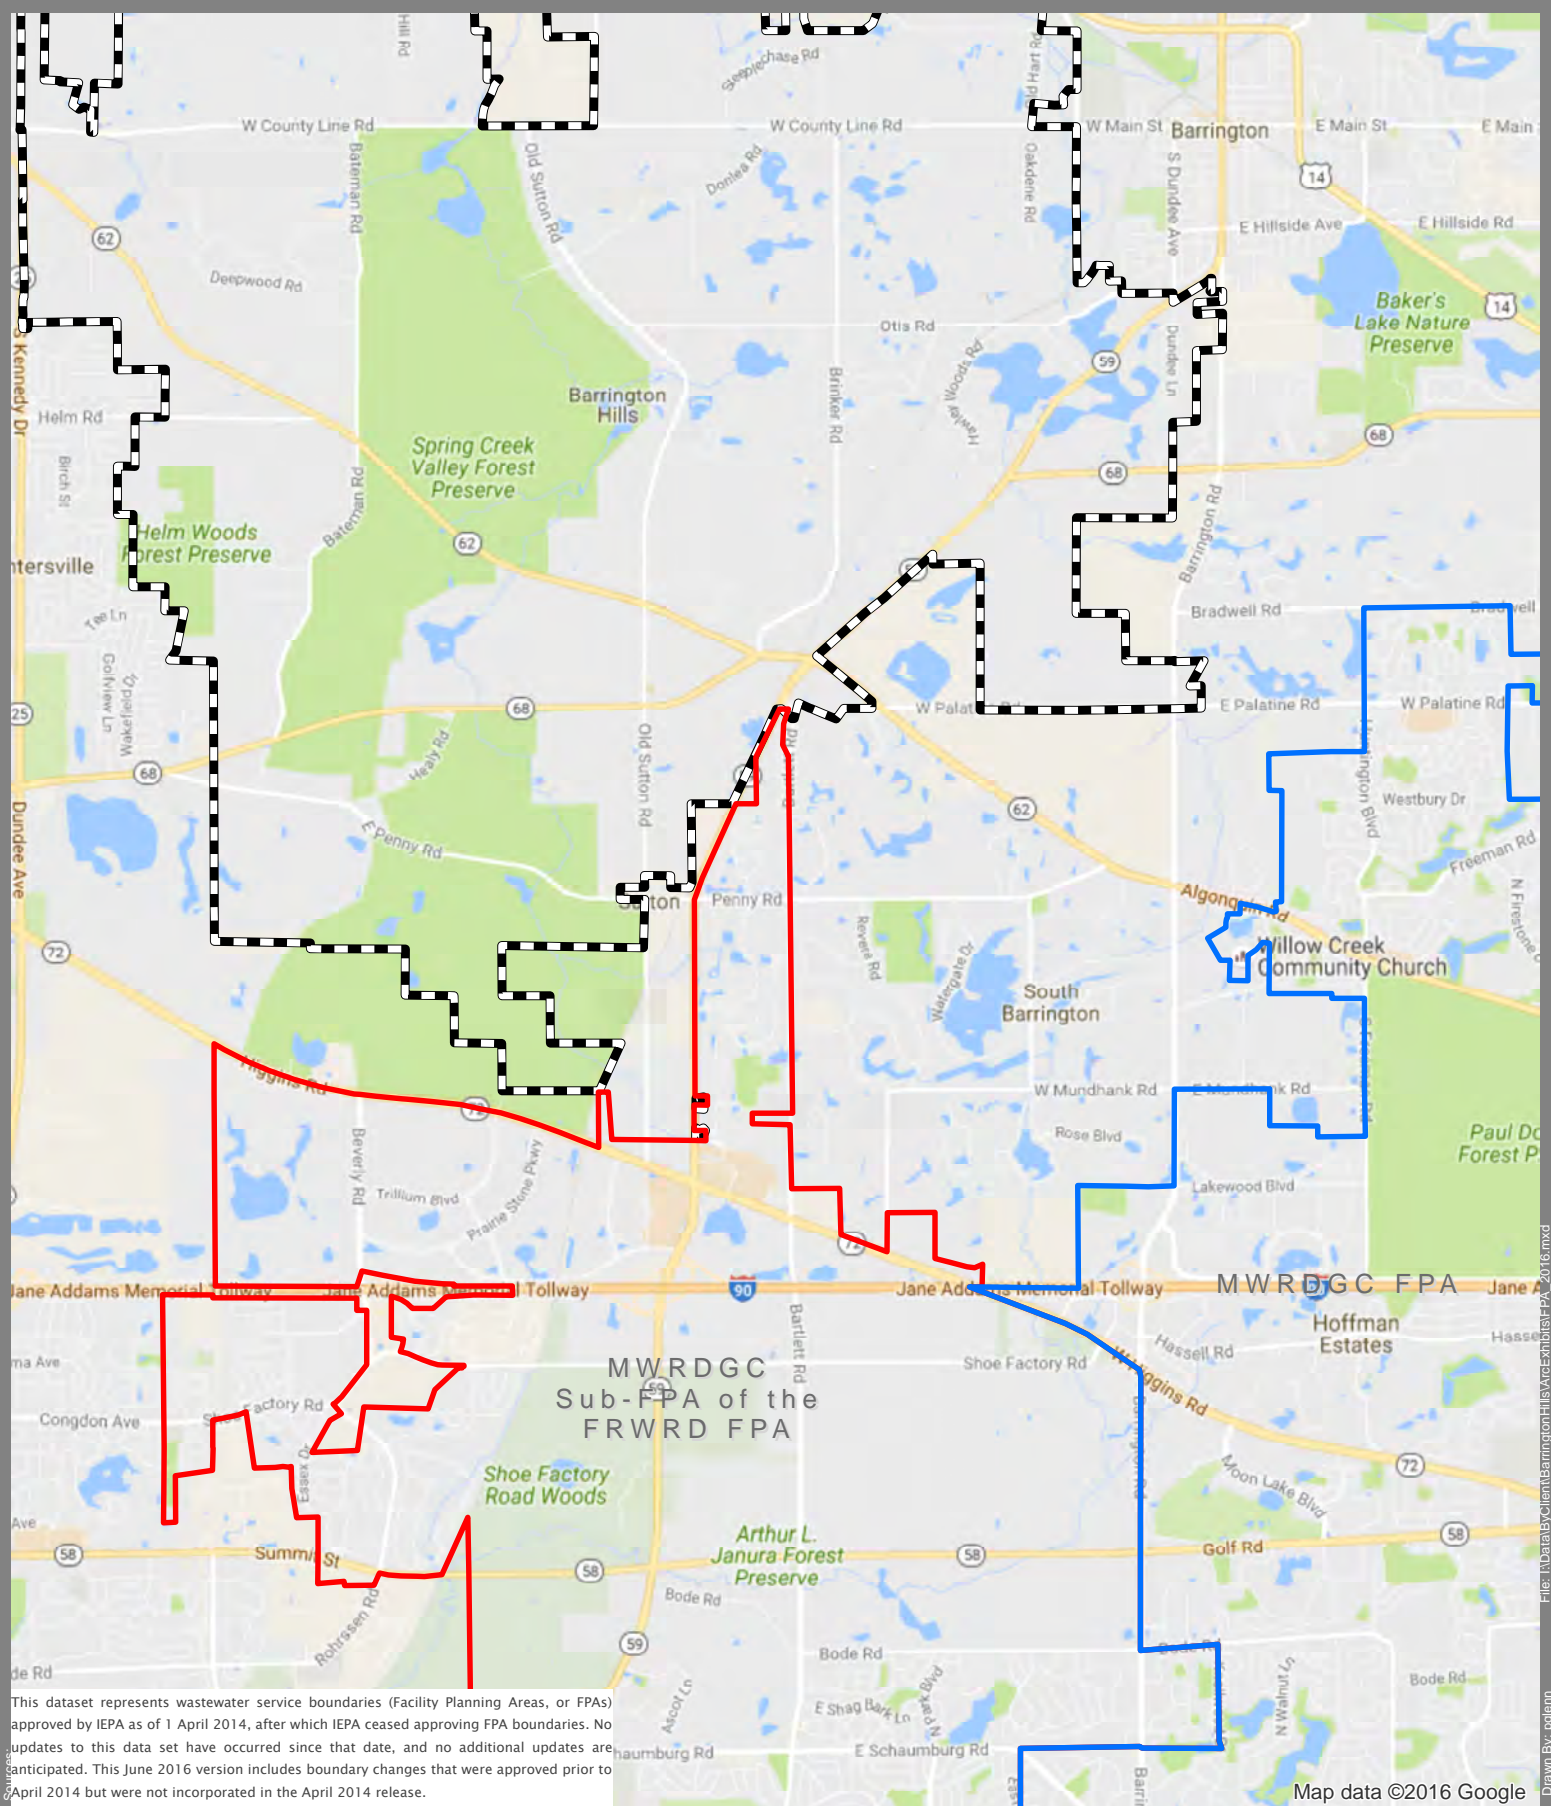

Since first discussed at the October 21st meeting of the Board of Trustees, respective staff of Barrington Hills and South Barrington have had occasion to review items in the existing Intergovernmental Agreement "IGA" Res 00-13 and prospective trends of interest to the two municipalities.

The following is the prospective highlights of a re-authorized IGA between South Barrington and Barrington Hills. The language is general but proposed with enough specificity to be the direction for the preparation of an IGA ,

- Recognize existing municipal boundaries;
- Transfer the basin territory east of IL State Rt 59 to South Barrington;
- Retain CCFPD territory west of IL State Rt 59 in South Barrington;
- Expansion of existing MWRDGC boundaries will only occur with mutual consent;
- Storm water release standards will follow the compatible table of design values in the Cook and Lake County Storm Water Ordinance;
- Coverage of agreement is limited to the municipal governments in IGA;
- Term is twenty years from acceptance;
- Convene committee through the office of the Village President to address issues that may arise during its terms.

There is attached as a proposed reference exhibit is the existing (2016) MWRD FPA Boundaries which are proposed to remain unchanged unless mutually agreed by VBH and South Barrington.

If these topics are acceptable, further review will occur for the preparation of the IGA to be returned for approval by the respective Village Boards. Likewise in the interim if other areas of interest should be addressed, they can be also identified for consideration.
