

Memo

To: Trustee Konicek
From: Robert Kosin, Director of Administration
CC: Board of Trustees, Village President
Date: February 21, 2014
Re: Bicycle Planning Status

The Village of Barrington Hills has received further instructions for the Local Technical Assistance Grant Award by the Chicago Metropolitan Agency Planning (CMAP) for Bicycle Planning

The scope remains regional that being one that spans multiple counties and for that purpose the Village will be recommending a scoping committee through the consultant selection process. CMAP as the funding agency will be steering the RFP and consultant selection process.

Public presentation of plans and their review would be the expected work product of the consultant.

Concurrently, the preliminary consideration of a bicycle path with the resurfacing of Haeger's Bend Road will await the distillation of the CMAP process and introduced later as an element in the planning process. No delay in road resurfacing is expected.

This additional route planning demonstrates the various bicycle plans that exist even along the proposed route of the Longmeadow Corridor, but disjointed by county or municipal boundaries.

It is proposed that at the next regular meeting of the Plan Commission, an over view presentation occur of the bicycle planning process.
