Re: Property Landscape Bioswale

---

Attached is a proposal to convert the vegetation – grass – in the existing drainage ditches on the Village Hall property which receives and conveys off site storm water from the parking lots on the Village Hall with plants that would ameliorate the quality of the water. This is a best management practice recommended in the storm water regulations applied or consulted by the Village. If this system was constructed today rather than 1994, this would be the standards for landscaping those ditches.

## Proposal for Services

Re: Barrington Hills Village Hall Bio-Swale-Rain Garden, Natural Area.

**Proposed Services:** Trillium proposes to manage the naturalized areas for the areas retrofitted in 2014. The first three years after installation at a minimum of native plantings is the most important for the development and growth of natural areas.

**Note:** These costs are calculated based on 2014 prices and are good for work in 2014. Each year's prices would be recalculated based on increases in cost of living and other unforeseen price fluctuations.

**Payment schedule:** Payment for specific tasks is due upon completion of those tasks.

**Agreement:** By signing this proposal, you agree to contract Trillium Native Landscapes, Inc. for the work described here. It should be understood that, should unforeseen circumstances arise, Trillium is not responsible for additional work beyond that described here, except by a separate contract.
